LISA K. CHONG, M.D.

MedRevenu was the best business decision we ever made.

We at Women's Medical Group of Upland used to have our billing in-house and always believed that our billing department was doing a good job. It was only when our previous biller moved out of the area that we started looking for a billing service. After interviewing several billing companies, we decided to partner with MedRevenu. Since then, our revenues drastically increased.

When MedRevenu took over, they quickly identified areas where revenues weren't maximized. With hard work and dedication, not only did they improve our billing, but they fixed our internal processes as well.

MedRevenu aggressively pursues outstanding claims and tracks our account receivables on a regular basis. Their monthly reporting is superb, relevant, and helps us predict trends and plan for the future. This gives us increased revenues and continued success.

More than just the billing, MedRevenu continues to help improve our business by assisting in our group's decision-making. They also help us negotiate our Payor contracts.

John Alvarez and his staff are always available for consultation and very easy to get along with. They quickly respond to our needs and maintain good communication with our Office Manager and staff.

We constantly recommend MedRevenu to our colleagues and always receive positive feedback. Their work is remarkable and we will continue to endorse them to our fellow physicians.

Thomas T. Easter, M.D.
